Haṭhapradīpikā: all 15 āsanas — a full study based on the critical edition (Oxford – Marburg, 2024)

Compiled on 12.10.2026 from the electronic critical edition "Light on Haṭha Yoga" (yoga.ames.ox.ac.uk). For every verse: Devanagari, the scholarly transliteration (IAST), the edition's translation, our own rendering, the metre, and the full apparatus of variant readings; at the end of every section — a word-by-word analysis, literal and literary translations, and then the editors' commentary (as in the edition, in English). ***This document contains no sigla: every manuscript is named in full wherever it is mentioned — collection, shelfmark, city; all abbreviations are expanded on the spot, no need to look them up.*** *There is no Cyrillic transliteration in this English version (its twin document, /home/user/hp_asanas_15.md, has one): Sanskrit is given in Devanagari and IAST only.*

The edition gives 15 āsanas: svastika, gomukha, vīra, kūrma, kukkuṭa, uttānakūrma, dhanu, matsyendra, paścimatāṇa, mayūra, śava — and four "best" ones: siddha, padma, siṃha, bhadra (verses 1.19–1.54; the frame — 1.17–1.18, the transition to prāṇāyāma — 1.55–1.56).

Contents

The section numbers are the numbers of the āsanas in the edition's list (fifteen in all: eleven ordinary ones plus four "principal" ones); sections without a number are the introductory and closing ones.

Section	Verses
Introduction: why āsana comes first	1.17, 1.18
1. Svastikāsana — the "auspicious" pose	1.19
2. Gomukhāsana — the "cow-faced" pose	1.20
3. Vīrāsana — the hero's pose	1.21
4. Kūrmāsana — the tortoise pose	1.22
5. Kukkuṭāsana — the cock pose	1.23
6. Uttānakūrmaka — the upturned tortoise	1.24
7. Dhanurāsana — the bow pose	1.25
8. Matsyendrāsana — Matsyendra's pose	1.26, 1.27
9. Paścimatāṇa — the "back-stretch"	1.28, 1.29
10. Mayūrāsana — the peacock pose	1.30, 1.31
11. Śavāsana — the corpse pose	1.32
The four principal āsanas and the 84 poses	1.33, 1.34
12. Siddhāsana — the adept's pose	1.35, 1.36, 1.37, 1.38, 1.39, 1.40, 1.41, 1.42, 1.43
13. Padmāsana — the lotus pose	1.44, 1.45–46, 1.47, 1.48, 1.49
14. Siṃhāsana — the lion pose	1.50–52
15. Bhadrāsana / Gorakṣāsana — the "auspicious" pose	1.53–54
Transition to prāṇāyāma	1.55, 1.56

How to read the apparatus (symbols)

"**In the edition — …**" — so this passage is printed in the critical edition; after that the variants found in the manuscripts are listed, and the manuscripts themselves are named.

"**Also "…" — so in: …**" — the manuscripts listed after the colon have this reading. "**So in: …**" after the words "In the edition" — precisely these manuscripts support the edition's reading (not all the rest).

In all the other manuscripts — the edition's formula (Latin *ceteri*): all the manuscripts except those listed support the edition's reading; when it says "including GOML 18885, Chennai", that manuscript is among them.

Conjecture of the editors — a reading found in no manuscript: the editors restored it themselves.

° (a small circle) — a sign of the edition's apparatus: the quotation is given in abbreviated form (not from the beginning or not to the end of the word). There are six such places in the text — verses 1.24, 1.35, 1.42, 1.44 and twice 1.56 — and all of them are expanded here to their full form: instead of "°m aṅghrimūla" the document reads "…yonisthānakam aṅghrimūla…", and next to it the passage is quoted as printed in the edition's apparatus. In the editors' comments ° marks a word boundary and has been replaced with a hyphen, e.g. "-doṣṇā", "tatkūrpara-".

<<…>> (double angle brackets) — so the letters are written in the manuscript itself (traces of a correction or an interlinear addition).

"before / after correction by the scribe" — the passage was corrected by the scribe himself; the edition records both states.

a, b, c, d — the quarters (pādas) of a verse: a — first, b — second, c — third, d — fourth. "1.53ab" means "the first two quarters of verse 1.53".

Word-by-word analysis — every word of the verse separately, with its meaning; sandhi is resolved, compounds are split with hyphens, and variant readings are noted in brackets where needed.

Literal translation — a rendering "word by word", following the order of the verse; **Literary translation** — the same sense in flowing English.

Every section has the same blocks: the apparatus verse by verse, and at the end of the section the word-by-word analysis, the two translations (literal and literary) and the editors' commentary.

Edition translation (English) — the translation printed in the critical edition itself; **Our rendering** — our own translation, given just below for comparison. Both are in English; where they differ, the difference is meaningful.

+ (plus) in a manuscript reading — letters illegible or lost (e.g. "eka + + +" means that in the manuscript something unclear is read in place of these syllables).

A manuscript is given in full the first time it is named inside a verse (collection, shelfmark, city; the expansions of NGMPP and GOML stand right there); further mentions of the same manuscript within that verse are shortened, e.g. "NGMPP B 62-20, Nepal", "GOML 18885, Chennai".

Leaves are cited as in the edition: "f. 84", "f. 84v" (verso).

Editors' commentary at the end of each section is given as in the edition (in English), with the sigla replaced by shelfmarks and the abbreviations expanded.

What these manuscripts are (reference table)

As named in this document	What it is	Where it is / note
“alpha-1”	NGMPP B 62-20, Nepal, microfilm of the Nepalese-German Manuscript Preservation Project (NGMPP)	A Nepalese manuscript; the original is in Kathmandu, microfilmed by the NGMPP project. The earliest branch in the edition; the leaf with the beginning of the āsana section is lost.
“alpha-2”	Jodhpur 02235, Jodhpur	A manuscript from Jodhpur (Rajasthan).
“alpha-3”	GOML 18885, Chennai, i.e. the Government Oriental Manuscripts Library	A manuscript from Chennai (formerly Madras).
“gamma-1”	NGMPP G 25-2, Nepal, microfilm of the Nepalese-German Manuscript Preservation Project (NGMPP)	A Nepalese manuscript (NGMPP microfilm); it has its own chapter divisions.
“gamma-2”	Jodhpur 02241, Jodhpur	A manuscript from Jodhpur.
“delta-1”	Sarasvatī Bhavan, ms. no. 30069, Vārāṇasī	A manuscript from Vārāṇasī.
“delta-2”	Staatsbibliothek zu Berlin, ms. or. 11056, Berlin	A manuscript from Berlin.
“delta-3”	Lalchand Research Library, ms. M-6494, Chandigarh (DAV College)	A manuscript from Chandigarh.
“delta-omega”	Jodhpur 02237, Jodhpur	A manuscript from Jodhpur.
“epsilon-1”	GOML R17256/SR8080, Chennai	The shelfmark was recovered from the project’s source files; the reader itself shows only the conventional name.
“epsilon-2”	GOML R3841/SR2190, Chennai	The shelfmark was recovered from the project’s source files.
“zeta-1”	Bharata Itihasa Samshodhaka Mandala (BISM), ms. no. 64/919, Pune	The shelfmark was recovered from the project’s source files.
“zeta-2”	NGMPP E-1528-1 / E-1527-7(4), Nepal, microfilm of the Nepalese-German Manuscript Preservation Project (NGMPP)	A Nepalese manuscript (NGMPP microfilm).
“zeta-3”	Sarasvatī Bhavan, ms. no. 30051, Vārāṇasī	A manuscript from Vārāṇasī; its colophon has a scribe’s note about the dynamic practice of dhanurāsana.
“eta-1”	Sarasvatī Bhavan, ms. no. 30109, Vārāṇasī, the oldest dated manuscript of the edition (1496 CE)	A manuscript from Vārāṇasī; the oldest dated manuscript of the edition.
“eta-2”	Maharaja Man Singh Pustak Prakash (MSPP), ms. no. 2230, Mehrangarh Fort, Jodhpur	A manuscript from the collection at Mehrangarh Fort (Jodhpur).
“eta-omega”	Staatsbibliothek zu Berlin, ms. or. fol. 2166, Berlin	A manuscript from Berlin.
“pi-1”	The project’s working code — P11	The shelfmark is not disclosed in the edition; in the project’s old working list this code is assigned to manuscript BORI 221/1882–83 (Pune).
“pi-2”	Lalchand Research Library, ms. M-2089, Chandigarh (DAV College)	A manuscript from Chandigarh.
“pi-omega”	Sarasvatī Bhavan, ms. no. 29899, Vārāṇasī	A manuscript from Vārāṇasī.
“chi”	the text of Brahmānanda after his commentary “Jyotsnā”, a late recension rather than a manuscript	Not a manuscript: the text in the recension of the commentator Brahmānanda (after the “Jyotsnā”).

> *Three manuscripts that the edition's reader called only by conventional names have now been identified: "epsilon-1" is GOML R17256/SR8080, Chennai; "epsilon-2" is GOML R3841/SR2190, Chennai; "zeta-1" is manuscript 64/919 of the Bharata Itihasa Samshodhaka Mandala (BISM), Pune. The shelfmarks come from the project's source files (the list of sigla and the edition's TEI markup): in some builds of the reader they are visible in the tooltips, in others only the code is shown. One conventional name remains: "pi-1" is the project's working code P11; the edition does not disclose its shelfmark (in the project's old working list, in a commented-out line, this code is assigned to manuscript BORI 221/1882–83, Pune). On the edition's site all the manuscripts are written with Greek letters; in this document they are everywhere replaced by shelfmarks.*

Dates of the manuscripts: what is known

Manuscripts with a firm date. One manuscript is explicitly dated in the edition, Sarasvatī Bhavan, ms. no. 30109, Vārāṇasī: in the comments on verses 1.24 and 1.56 the editors call it the "oldest dated manuscript". The year is not printed in the reader; the project's public materials give it as **1496 CE** — only about a century from the supposed time of Svātmārāma's authorship (the early 15th century). This manuscript (Sampūrṇānanda Library, no. 30109) is known in the scholarly literature as well — it is referred to, for instance, in an article on the Amaraughaprabodha (Journal of Indian Philosophy, 2019).

In the other manuscripts the dates survive in the colophons — they are transcribed in the editors' draft files. A systematic check of the edition's sources (the archive of the project's LaTeX files of 20 May 2026) yielded five more dated copies. The dates stand in scribal notes at the end of the text and are written in the figures of the "saṃvat" era (i.e. the Vikrama era; subtracting 57 gives the year CE):

Maharaja Man Singh Pustak Prakash (MSPP), no. 2230, Jodhpur (in the apparatus — "eta-2"): "saṃvat 16|83" → 1683 of the Vikrama era, that is **1626–1627 CE** (in the apparatus to chapter 1 this manuscript occurs 104 times — it is the second oldest dated copy in the whole corpus); Sarasvatī Bhavan, ms. no. 29899, Vārāṇasī (in the apparatus — "pi-omega"): "…saṃvat 16|93 varṣe … liṣitaṃ jamadagnigirisanyāsī svātmapaṭhanārthaṃ" → 1693 of the Vikrama era, that is **1636–1637 CE**; it was copied by the ascetic Jamadagni-giri "for his own reading"; Sarasvatī Bhavan, ms. no. 30069, Vārāṇasī (in the apparatus — "delta-1", the most "talkative" manuscript of chapter 1, with 137 differences from the edition's text): "…iti haṭhayogapradīpikāyāṃ … saṃvat 1707 jyeṣṭha kṛṣṇa 4 bhṛgau liṣitam idaṃ" → 1707 of the Vikrama era, that is **1650–1651 CE**; the month of Jyeṣṭha, the fourth day of the dark fortnight; Jodhpur 02237, Jodhpur (in the apparatus — "delta-omega"; four chapters): at the end of the colophon it notes "saṃvat 1802" → **1745–1746 CE** (the first leaf of the manuscript bears an ownership note: "this book belongs to Gulābarāi, son of Tulsīrāma-śarman"); Jodhpur 23709, Jodhpur — "saṃvat 1724" → **1667–1668 CE**; this is a copy from the same project, but it was not collated for chapter 1.

All five notes are the editors' remarks in the comments to the draft files of the edition (they are not in the published digital reader); the era is not stated in the colophons themselves, and the final dates, checked against the manuscripts, will appear in the introduction to the printed book. But the picture is already clear: the earliest dated copies are 1496 (30109), 1626/27 (MSPP 2230), 1636/37 (29899), 1650/51 (30069), 1667/68 (Jodhpur 23709), 1745/46 (Jodhpur 02237).

Several witnesses have colophons that survive without a date. GOML R17256/SR8080, Chennai (in the apparatus — "epsilon-1"): "śrī śivāya namaḥ … gaṇapati svahasta likhitaṃ" — "written by the hand of Gaṇapati himself", no date. Lalchand M-2089, Chandigarh (in the apparatus — "pi-2"): only an ownership note, "pustakam idaṃ jājīrāmavyāsasya". Lalchand M-6494, Chandigarh (in the apparatus — "delta-3"): "…iti śrīmadātmārāmaviracitāyāṃ … upadeśaḥ … śubham astu sarvajagatām". NGMPP B 62-20, Nepal (in the apparatus — "alpha-1"): the brief "śrīsahajasadguruātmārāmārpaṇa saṃpūrṇam". NGMPP E-1528-1 / E-1527-7(4) (in the apparatus — "zeta-2") has no colophon at all: the text ends exactly on leaf 346, and another work begins on the next leaf.

The Berlin manuscripts are described in detail in the printed VOHD catalogue. Our two Berlin manuscripts received no dating in the catalogue "Indian Manuscripts" (Verzeichnis der orientalischen Handschriften in Deutschland). Staatsbibliothek zu Berlin, or. fol. 2166 (= "eta-omega"): VOHD II, 8 (no. 3417) — a paper manuscript, 53 leaves, Devanagari script, six lines to a page; explicitly marked "Undatiert" ("undated"), and the title stands in the colophon in the form "Hathapradipikā". Staatsbibliothek zu Berlin, or.

11056 (= “delta-2”): VOHD II, 16 (no. 5442) — a paper manuscript in Śāradā script, leaves 1–48 and 1–[22], ten lines; it contains an incomplete “Hathayogapradīpikā” (whose first verse is “śrīādināthāya namo ’stu…”) and the “Rudrayāmala-Vijñānabhairava”; no date is given in the description.

The same catalogue describes two more Berlin “Hathayogapradīpikās” — neither was collated for the edition, but it is curious that they too are undated: Ms.or.oct. 659 (VOHD II, 8, no. 3416) — a paper manuscript, 43 leaves, Devanagari, “Undatiert”; and Hs or. 13133 (VOHD II, 15, no. 5136.2) — palm leaves, Grantha script, badly damaged, in a collection together with the “Haṭharatnāvalī”; here the “Hathayogapradīpikā” is incomplete (the colophon covers only the first section), and again there is no date. In all, four copies of the “Hathayogapradīpikā” are recorded in Berlin, and not one of them is dated.

The Lalchand Research Library (DAV College, Chandigarh) — the digital archive dav.splrarebooks.com. Our two manuscripts from it — M-2089 (= “pi-2”: 37 pages, Devanagari, from Bahawalpur) and M-6494 (= “delta-3”: 727 pages, Śāradā script, a collection called “Hathayogapradīpikādi-granthasaṅgraha”) — have no dates in their digital records. Other copies in the same library, however, do: M-1293 — 1911 of the “saṃvat” era (≈1854 CE), M-2082 — 1775 (≈1718), M-2091 — 1923 (≈1866), M-4530 — 1888 (≈1831).

The remaining witnesses (sixteen of the twenty-one manuscripts) have no dates. Undated are the Nepalese microfilms (NGMPP B 62-20, G 25-2, E-1528-1 / E-1527-7(4), A62-33), Sarasvatī Bhavan 30051, GOML 18885 / R17256/SR8080 / R3841/SR2190, BISM 64/919, “pi-1” (P11 in the project’s working list), Jodhpur 02235 and 02241.

For comparison: the Kaivalyadhāma edition of 1970 relied on only 9 manuscripts, and its oldest dated manuscript is from 1629 (Calcutta No. TH 321); the date assigned to the text itself is broad: “1350–1550”. A manuscript of 1496 in the new corpus is a qualitative step forward.

Where else to look for dates: the descriptive catalogues of the NGMCP (Hamburg) — for the Nepalese films (in 2026 its online search is unavailable, and the archived wiki copy preserved only one page); the descriptive catalogues of the Sarasvatī Bhavan manuscripts (Sampūrṇānanda, Vārāṇasī); the catalogues of RORI and MSPP (Jodhpur; OCR of their scans barely recognises Devanagari); the printed introduction to the edition (EFEO, Pondicherry, late 2026) — it will contain full descriptions of all the manuscripts.

Introduction: why āsana comes first

Verses: 1.17, 1.18

Verses 1.17–1.18 frame the section: āsana as the first step and the announcement of the list. Edition footnote: after 1.18 the manuscript “epsilon-1” adds two verses of its own with its own list of āsanas (see below).

IAST

> *haṭhasya prathamāṅgatvādāsanaṃ pūrvam ucyate /*
> *tat kuryād āsanaṃ sthairyam ārogyaṃ cāṅgapāṭavam //*

Edition translation (English): Because it is the first auxiliary of Haṭha, *āsana* is taught first. This type of *āsana* brings about steadiness, good health and physical fitness.

Our rendering: Āsana is the first limb of Haṭha yoga, and so it is taught first: it brings steadiness, health and suppleness of the limbs.

Variant readings in the manuscripts:

In the following witnesses the verse is transposed with the next one: Sarasvatī Bhavan, ms. no. 30069, Vārāṇasī; Staatsbibliothek zu Berlin, ms. or. 11056, Berlin; Sarasvatī Bhavan, ms. no. 30051, Vārāṇasī.

Before the word “haṭhasya” the manuscripts add: “athāsanāni” — so in: Bharata Itihasa Samshodhaka Mandala (BISM), ms. no. 64/919, Pune. “<<atha>> āsanāni” — so in: Sarasvatī Bhavan, ms. no. 30051, Vārāṇasī.

In the edition — “tat kuryād” (so in all the manuscripts, including GOML 18885, Chennai, except those listed below). Also “ta kuryād” — so in: Jodhpur 02235, Jodhpur. Also “na kuryād” — so in: NGMPP B 62-20, Nepal, microfilm of the Nepalese-German Manuscript Preservation Project (NGMPP). Also “kuryāt tad” — so in: Maharaja Man Singh Pustak Prakash (MSPP), ms. no. 2230, Mehrangarh Fort, Jodhpur and the text of Brahmānanda after his commentary “Jyotsnā”, a late recension rather than a manuscript.

In the edition — “āsanaṃ sthairyam” (so in: Jodhpur 02235, Jodhpur; GOML 18885, Chennai, i.e. the Government Oriental Manuscripts Library; NGMPP G 25-2, Nepal, microfilm of the Nepalese-German Manuscript Preservation Project (NGMPP); Staatsbibliothek zu Berlin, ms. or. 11056, Berlin; GOML R17256/SR8080, Chennai, i.e. the Government Oriental Manuscripts Library; Sarasvatī Bhavan, ms. no. 30109, Vārāṇasī, the oldest dated manuscript of the edition (1496 CE); the manuscript “pi-1”, the project’s working code P11 (shelfmark not disclosed in the edition); the text of Brahmānanda after his commentary “Jyotsnā”, a late recension rather than a manuscript). Also “āsanasthairyam” — so in: NGMPP B 62-20, Nepal; Sarasvatī Bhavan, ms. no. 30069, Vārāṇasī; Bharata Itihasa Samshodhaka Mandala (BISM), ms. no. 64/919, Pune; Lalchand Research Library, ms. M-2089, Chandigarh (DAV College); Sarasvatī Bhavan, ms. no. 29899, Vārāṇasī. Also “āsane sthairyaṃ” — so in: Sarasvatī Bhavan, ms. no. 30051, Vārāṇasī. Also “āsanaṃ tasmād” — so in: MSPP, ms. no. 2230, Jodhpur.

In the edition — “pāṭavam” (so in: NGMPP B 62-20, Nepal; GOML 18885, Chennai; GOML R17256/SR8080, Chennai; Bharata Itihasa Samshodhaka Mandala (BISM), ms. no. 64/919, Pune; Sarasvatī Bhavan, ms. no. 30109, Vārāṇasī; MSPP, ms. no. 2230, Jodhpur; the manuscript “pi-1”, the project’s working code P11 (shelfmark not disclosed in the edition); Sarasvatī Bhavan, ms. no. 29899, Vārāṇasī). Also “pāṭave” — so in: Jodhpur 02235, Jodhpur. Also “lāghavaṃ” — so in: NGMPP G 25-2, Nepal; Sarasvatī Bhavan, ms. no. 30069, Vārāṇasī; Staatsbibliothek zu Berlin, ms. or. 11056, Berlin; Sarasvatī Bhavan, ms. no. 30051, Vārāṇasī;

Lalchand Research Library, ms. M-2089, Chandigarh (DAV College); the text of Brahmānanda after his commentary "Jyotsnā", a late recension rather than a manuscript.

Parallel passages in other texts: Haṭharatnāvalī 3.5, Yogacintāmaṇi f. 84r (attributed to the Haṭhapradīpikā)

Variant readings in the manuscripts:

The leaf with this verse is lost: NGMPP B 62-20, Nepal, microfilm of the Nepalese-German Manuscript Preservation Project (NGMPP); Sarasvatī Bhavan, ms. no. 30069, Vārāṇasī; Staatsbibliothek zu Berlin, ms. or. 11056, Berlin; Sarasvatī Bhavan, ms. no. 30051, Vārāṇasī. In the following witnesses the verse is transposed with the preceding one: Sarasvatī Bhavan, ms. no. 30069, Vārāṇasī; Staatsbibliothek zu Berlin, ms. or. 11056, Berlin; Sarasvatī Bhavan, ms. no. 30051, Vārāṇasī.

In the edition — "kathyante" (so in all the manuscripts except those listed below). Also "vakṣyante" — so in: Sarasvatī Bhavan, ms. no. 30069, Vārāṇasī and Staatsbibliothek zu Berlin, ms. or. 11056, Berlin. Also "likhyante" — so in: Sarasvatī Bhavan, ms. no. 30109, Vārāṇasī, the oldest dated manuscript of the edition (1496 CE).

Parallel passages in other texts: Haṭharatnāvalī 3.6, Yogacintāmaṇi f. 84r (attributed to the Haṭhapradīpikā)

In the edition — kathyante; lakṣyante — in Haṭharatnāvalī; vakṣyante — in Yogacintāmaṇi.

Edition footnotes about the manuscripts:

Word-by-word analysis

1.17. haṭhasya - of Haṭha [yoga] (gen.); prathama-aṅgatvāt - because [āsana] is the first constituent part; āsanam - āsana; pūrvam - first, before [everything else]; ucyate - is taught, is called; tat - therefore, that;

kuryāt - one should perform; āsanam - the āsana; sthairyam - steadiness, firmness [of the body]; ārogyam - health, freedom from disease; ca - and; aṅga-pāṭavam - suppleness, lightness of the limbs.

1.18. vasiṣṭha-ādyaiḥ - by Vasiṣṭha and others; ca - and; munibhiḥ - by sages; matsyendra-ādyaiḥ - by Matsyendra and others; ca - and; yogibhiḥ - by yogis; aṅgīkṛtāni - accepted, approved (lit. "taken as one's own"); āsanāni - āsanas; kathyante - are taught, are described; kānicit - some; mayā - by me.

Literal translation

Because [āsana] is the first constituent part of Haṭha [yoga], it is taught first. That āsana one should perform [for the sake of] steadiness, health and suppleness of the limbs.

Some āsanas accepted by sages — by Vasiṣṭha and others — and by yogis — by Matsyendra and others — are taught by me.

Literary translation

In Haṭha yoga āsana is the first step, and so it is taught before everything else. Āsanas are practised for the steadiness of the body, for health and for suppleness of the limbs.

Those āsanas that were adopted by the sages headed by Vasiṣṭha and by the yogis headed by Matsyendra, I shall now — at least some of them — describe.

Editors' commentary, on verse 1.17 (as in the edition, in English; manuscript names expanded to shelfmarks):

The reading *aṅgapāṭavam* is attested among many of the early manuscripts, including the "alpha" group. Although this compound rarely appears in other yoga texts, a similar term, *śarīrapāṭava*, occurs in the *Śivasaṃhitā* (2.35) as one of the benefits bestowed by digestive fire (*vaiśvānarāgni*), which indicates that the word *pāṭava* was used in relation to the body and the benefits of yoga. The compound *aṅgapāṭava* seems to imply the optimal functioning of the body. The variant reading, *aṅgalāghava* ('lightness of the limbs' or 'dexterity') is more common in yoga texts and similar formulations occur even in works known to Svātmārāma, such as the *Dattātreyayogaśāstra* (*śarīralaghutā*) and the *Amanaska* ([...] *laghutvaṃ ca śarīrasyopajāyate*). It appears that the less common term *aṅgapāṭavam* was changed to the more widely used notion of *aṅgalāghava*, perhaps early in the transmission, as the latter is attested by manuscripts in several early groups (i.e. "gamma", "delta", and "pi").

Editors' commentary, on verse 1.18 (as in the edition, in English; manuscript names expanded to shelfmarks):

On the historical implications of these two traditions of postural practice in early Haṭhayoga, see *Mallinson* 2016: 119–122 and *Birch* 2018a: 45–46.

1. Svastikāsana — the “auspicious” pose

Verses: 1.19

A simple seated pose with crossed legs. The “lost leaf” begins already here: in manuscript NGMPP B 62-20 the leaves with the opening of the āsana section are lost.

Verse 1.19

Word-by-word analysis

1.19. jānu-ūrvoḥ - of the knees and thighs; antare - in the space between (some manuscripts: antaraṃ, "into the space"); samyak - properly, well; kṛtvā - having placed (lit. "having made"); pāda-tale - the two soles of the feet; ubhe - both; ṛju-kāyaḥ - with the body straight; samāsīnaḥ - sitting upright (sam-āsīna; some manuscripts: tathāsīnaḥ); svastikam - the svastika ("auspicious") posture; tat - that; pracakṣate - they call.

Literal translation

Having properly placed both soles of the feet in the space between the knees and the thighs, and sitting with the body straight — that they call the svastika posture.

Literary translation

Svastikāsana, the "auspicious pose". Both soles are tucked into the spaces between the thighs and the knees (close to the knees), and one sits with the body held straight: this posture is called svastika.

Editors' commentary (as in the edition, in English; manuscript names expanded to shelfmarks):

One might wonder how the soles of the feet could be placed between the knees and thighs. Brahmānanda explains that the region of the shank near the knee should be understood by the word 'knee' in this verse (*atra jānuśabdena jānusaṃnihito jaṅghāpradeśo grāhyaḥ jānusaṃnihito jaṅghāpradeśaḥ*). This is consistent with the earliest known description of *svastikāsana*, found in the *Pātañjalayogaśāstravivaraṇa* (2.46), which states that the big toe of one foot is tucked in between the shank and thigh of the other so it is not seen (*dakṣiṇaṃ pādāṅguṣṭhaṃ savyenorujaṅghena parigṛhyādṛśyaṃ kṛtvā tathā savyaṃ pādāṅguṣṭhaṃ dakṣiṇenorujaṅghenādṛśyaṃ parigṛhya yathā ca pārṣṇibhyāṃ vṛṣaṇayor apīḍaṇaṃ tathā yenāste tat svastikam āsanam*). For a discussion of *svastikāsana* in the Pātañjalayoga tradition, see *Maas* 2018: 68–69. The descriptions of *svastikāsana* in early Śaiva Tantras do not mention the inserting of the toes between the knees and thighs (see *Goodall* 2004: 348–350, fn. 371).

2. Gomukhāsana — the “cow-faced” pose

Word-by-word analysis

1.20. savye - on the left [side]; dakṣiṇa-gulpham - the right ankle (heel); tu - but, and; pṛṣṭha-pārśve - at the side of the back; niyojayet - one should place, apply; dakṣiṇe - on the right [side]; api - also; tathā - in the same way; savyam - the left [ankle]; gomukham - gomukha, "cow-faced" [posture]; yathā - as, like [a cow's face].

Literal translation

The right ankle one should place on the left at the side of the back, and the left one in the same way on the right: [this is] gomukha, [shaped] like a cow's face.

Literary translation

Gomukhāsana, the "cow-faced pose". The right heel is tucked in on the left side of the back and the left one on the right, so that the knees stack one upon the other and the pose looks like a cow's face.

Editors' commentary (as in the edition, in English; manuscript names expanded to shelfmarks):

This posture first appears in some Vaiṣṇava *Saṃhitā*s that predate the *Haṭhapradīpikā*, including the *Ahirbudhnyasaṃhitā* and the *Vasiṣṭhasaṃhitā*, which is likely to have been the source of this verse. The position of the ankles is the same in all the source texts. The *Ahirbudhnyasaṃhitā* adds that the hands are crossed behind the back and hold the big toes. For illustrations of six possible positions of the arms and hands, see *Gharote, Jha, Devnath, Sakhalkar* 2006: 111–113.

Word-by-word analysis

1.21. ekam pādam - one foot; atha - then; ekasmin … ūruṇi - on one thigh; vinyasya - having placed, arranged; saṃsthitam - set [there]; itarasmin - on the other; tathā - in the same way; ca - and; ūrum - the [other] thigh; vīrāsanam - Vīrāsana, the “hero’s pose”; iti - thus; īritam - is called, is uttered.

Literal translation

Having placed one foot on one thigh and the [other] thigh in the same way on the other [foot], this is called Vīrāsana.

Literary translation

Vīrāsana, the “hero’s pose”: one foot lies on the thigh of the other leg, and that thigh, in turn, is pressed against this foot.

Editors’ commentary (as in the edition, in English; manuscript names expanded to shelfmarks):

Although most witnesses have *tathā* in 1.21a, the word *atha* has been accepted because it is attested by GOML 18885, Chennai and Sarasvatī Bhavan, ms. no. 30109, Vārāṇasī, the sources and the testimonia. It appears to be verse filler here rather than indicating a temporal sequence of actions. Svātmārāma borrowed the verse on *vīrāsana* from the *Vasiṣṭhasaṃhitā*, the redactor of which appears to have adapted its first line from a description of this posture in the *Śāradātilakatantra*. This would explain the rather strange syntax of the *Vasiṣṭhasaṃhitā*’s version, in which *adhaḥ kṛtvā* was changed to *athaikasmin*, and *tathetaram* became *ca saṃsthitam*. It seems that *saṃsthitaṃ* must be understood with *ūruṃ* in the third *pāda* in the sense of *saṃsthāpya* (i.e. ‘having placed’). Different versions of *vīrāsana* are found in earlier tantric and yogic works, such as the *Kiraṇatantra*, Hemacandra’s *Yogaśāstra* and commentaries on the *Pātañjalayogaśāstra*. For a discussion of some of these, see *Maas* 2018: 66–68.

Word-by-word analysis

1.22. gudam - the anus; niṣpīḍya - having pressed firmly; gulphābhyām - with the [two] ankles; vyutkrameṇa - crosswise (lit. “in reverse order”); samāhitaḥ - collected, concentrated; kūrmāsanam - Kūrmāsana, the “tortoise pose”; bhavet - arises, will be; etat - this; iti - thus; yoga-vidaḥ - knowers of yoga; viduḥ - know.

Literal translation

Having pressed the anus with the ankles [placed] crosswise, a collected [yogi] — this is Kūrmāsana; thus know the knowers of yoga.

Literary translation

Kūrmāsana, the “tortoise pose”. Crossing the ankles and pressing them firmly against the perineum, the collected practitioner takes this posture — so say the knowers of yoga.

Editors’ commentary (as in the edition, in English; manuscript names expanded to shelfmarks):

In the first quarter of the verse, the witnesses are split between *nirudhya* (‘having blocked’), *nibadhya* (‘having bound’), *niyamya* (‘having restrained’) and *niṣpīḍya* (‘having pressed’). The source, the *Vasiṣṭhasaṃhitā*, and two manuscripts of the “gamma” and “pi” groups support *nirudhya* whereas Jodhpur 02235, Jodhpur and the testimonia support *niyamya* and GOML 18885, Chennai has *niṣpīḍya*. While *nirudhya* makes sense here (i.e. ‘having blocked or closed the anus...’), we have adopted *niṣpīḍya* because it is better attested among the “alpha”, “epsilon” and “eta” groups. The word *vyutkrameṇa* describes the position of the ankles. Its basic meaning is ‘against the normal direction.’ In *āsana* descriptions it usually means ‘crossed’ (see e.g. *Vasiṣṭhasaṃhitā* 1.71), which is how we have understood it here. It could also mean ‘turned out’: if the yogi is in a kneeling-type position, turning the feet out would bring the ankles together, blocking the perineal area. See *Yoga Mīmāṃsā*, vol. 8, no. 2 (1965: 29–30) for a discussion of *vyutkrameṇa* and the position of the ankles in *kūrmāsana*, and vol. 8, no. 2, figures 3–6 for photographs of a practitioner performing this *āsana*.

5. Kukkuṭāsana — the cock pose

Word-by-word analysis

1.23. padmāsanam - the lotus pose (Padmāsana); susaṃsthāpya - having firmly taken up; jānu-ūrvoḥ antare - into the space between the knees and the thighs; karau - the two hands; niveśya - having inserted; bhūmau - on the ground; saṃsthāpya - having placed; vyomasthaḥ - abiding in the air (vyoman-stha); kukkuṭāsanam - Kukkuṭāsana, the “cock pose”.

Literal translation

Having firmly taken up the lotus pose, inserted both hands into the space between the knees and the thighs and placed them on the ground, [the yogi] abides in the air: [this is] Kukkuṭāsana.

Literary translation

Kukkuṭāsana, the “cock pose”. Seated in the lotus, one slips the hands through the gaps between the thighs and the knees, rests the palms on the ground and lifts the body into the air, balancing on the hands.

Editors’ commentary (as in the edition, in English; manuscript names expanded to shelfmarks):

The names *kurkuṭa* and *kurkkuṭa* in some manuscripts are variant spellings of *kukkuṭa* attested in the *Pañcatantra* (MW).

Word-by-word analysis

1.24. kukkuṭāsana-bandha-sthaḥ - standing in the "binding" of the cock pose; dorbhyām - with both arms; saṃbadhya - having clasped, bound; kandharām - the neck; śete - he lies; kūrmavat - like a tortoise; uttānaḥ - turned upwards, on the back; etat - this; uttāna-kūrmakam - Uttānakūrmaka, the "upturned tortoise".

Literal translation

Standing in the binding of the cock pose, having clasped his neck with both arms, [the yogi] lies like a tortoise, upturned on his back: this is uttānakūrmaka.

Literary translation

Uttānakūrmaka, the "upturned tortoise". From the cock pose one clasps the neck with the arms, lies back and stays still, like a tortoise turned on its shell.

Editors' commentary (as in the edition, in English; manuscript names expanded to shelfmarks):

The oldest dated manuscript, Sarasvatī Bhavan, ms. no. 30109, Vārāṇasī, has *kukkuṭāsanavat kṛtvā*, which is a simpler alternative to the widely attested reading *kukkuṭāsanabandhasthaḥ* (including Jodhpur 02235, Jodhpur and GOML 18885, Chennai), which we have accepted. Since there is no known source for this verse other than the *Haṭhapradīpikā*, it appears that the reading of Sarasvatī Bhavan, ms. no. 30109, Vārāṇasī was an isolated attempt to simplify the syntax.

7. Dhanurāsana — the bow pose

Verses: 1.25

Note: in manuscript Sarasvatī Bhavan (ms. no. 30051), Vārāṇasī, the scribe adds a remark that dhanurāsana is to be practised without interruption (dynamically), to the left and to the right — see the commentary.

Word-by-word analysis

1.25. pāda-aṅguṣṭhau - the big toes of both feet; tu - but, and; pāṇibhyām - with both hands; gṛhītvā - having grasped; śravaṇa-avadhi - as far as the ear (lit. "with the ear as the limit"); dhanur-ākarṣaṇam - the drawing of a bow; kṛtvā - having done; dhanurāsanam - Dhanurāsana, the "bow pose"; ucyate - is called.

Literal translation

Having grasped the big toes of both feet with the hands and performed the drawing of a bow as far as the ear, [this] is called Dhanurāsana.

Literary translation

Dhanurāsana, the "bow pose": seizing the big toes with the hands, one bends and pulls the body as if drawing a bow, until [the feet] come close to the ears.

Editors' commentary (as in the edition, in English; manuscript names expanded to shelfmarks):

We have adopted the reading *dhanurākarṣaṇaṃ kṛtvā*, which is in the "delta" group, as well as the principal testimonia (i.e. the *Yogacintāmaṇi* and *Haṭharatnāvalī*), because it fits the overall syntax of the verse, unlike the readings with *kṛṣṭaṃ* (for *kṛtvā*) that are found in the early manuscripts. It is curious that *kṛṣṭaṃ* is so well attested because it seems redundant with *ākarṣaṇaṃ*. The following reading in Godāvaramiśra's *Yogacintāmaṇi* (f. 40r) appears to be an attempt to make sense of *kṛṣṭaṃ*: *dhanurākarṣavat kṛṣṭaṃ dhanurāsanam ucyate*. A different version of *dhanurāsana* is described in the *Haṭhayogasaṃhitā*. On the two versions of *dhanurāsana*, see *Hargreaves and Birch* 2017. One of the collated manuscripts of the *Haṭhapradīpikā*, Sarasvatī Bhavan, ms. no. 30051, Vārāṇasī, has a scribal comment stating that *dhanurāsana* should be done continuously (*anavarata*) on the left and right sides (*tatra ekam dhanurākarṣaṇāsanam āsanaṃ savyāpasavyapādahastābhyām [abhy]ased anavaratam*). This would make *dhanurāsana* a dynamic practice as shown in this video.

8. Matsyendrāsana — Matsyendra's pose

Word-by-word analysis

1.26. vāma-ūru-mūla-arpita-dakṣa-pādam - [the pose] in which the right foot is placed at the base of the left thigh (a bahuvrīhi compound); jānoḥ bahir-veṣṭita-dakṣa-doṣṇā - with the right arm wrapped around the outside of the knee; pragṛhya - having seized, holding; tiṣṭhet - one should stay, stand; parivartita-aṅgaḥ - with the body turned [aside]; śrīmat-matsyanātha-uditam - taught by the revered Matsyanātha (udita — spoken); āsanam - posture; syāt - may be, let it be.

1.27. matsyendra-pīṭham - "Matsyendra's seat" (pīṭha — seat, posture); jaṭhara-pracaṇḍa-picaṇḍa-ruj-maṇḍala-khaṇḍana-astram - a weapon that shatters the hosts of fierce, tormenting diseases of the belly; abhyāsataḥ - through practice; kuṇḍalinī-prabodham - the awakening of Kuṇḍalinī; daṇḍa-sthiratvam - steadiness [firm] as a staff (of the spine); ca - and; dadāti - it gives; puṃsām - to men.

Literal translation

That [pose] in which the right foot is placed at the base of the left thigh and is held by the right arm wrapped around the outside of the knee, with the body turned aside — let it be the posture taught by the revered Matsyanātha. "Matsyendra's seat" is a weapon that shatters the hosts of fierce tormenting diseases of the belly; through practice it gives men the awakening of Kuṇḍalinī and steadiness of the spine.

A caveat follows from this: neither "Matsyendra's seat" nor "Matsyendra's pose" describes the twist as it is practised today: here the foot is placed at the root of the thigh, and the arm encircles the knee from outside.

Literary translation

Matsyendrāsana — the pose taught by the revered Matsyanātha: the right foot is set at the root of the left thigh, the right arm, brought round the outside of the knee, holds [the foot], and the trunk is turned to the side. This is "Matsyendra's seat", a formidable weapon against the many wasting ailments of the belly. Persistent practice awakens Kuṇḍalinī and gives the body unshakeable steadiness.

Editors' commentary, on verse 1.26 (as in the edition, in English; manuscript names expanded to shelfmarks):

In the second verse quarter, most of the manuscript groups have a compound with *doṣṇā* at the end, as seen also in the *Yogacintāmaṇi*, *Haṭharatnāvalī* and *Yuktabhavadeva*. The instrumental ending ('with the hand') works well with the gerund (*pragṛhya*) in the third verse quarter and the object (*dakṣpādaṃ*) in the first quarter. This reading indicates that the right foot is held by the hand of the arm that is wrapped around the outside of the left leg, which would be the right hand (*dakṣadoṣṇā*) rather than the left (*vāmadoṣṇā*), as shown in Figure 1. GOML 18885, Chennai and most manuscripts of the *Haṭharatnāvalī* have *dakṣapādo* in the first *pāda*. This reading yields the same meaning as the adopted one if read with *vāmapādaṃ* in the second. However, GOML 18885, Chennai and manuscripts of the *Haṭharatnāvalī* read *vāmadoṣṇā*, which is not good because it leaves the gerund without an object. The version of this verse in *Jyotsnā* (1.26), which is supported by some manuscripts in two important groups, "eta" and "pi", has two objects of the gerund, namely the left and right feet, without an instrumental or conjunctive particle. In his commentarial remarks, Brahmānanda proposes that the left foot is grasped by the right hand and the right foot by the left foot, as seen in Figure 2.

Editors' commentary, on verse 1.27 (as in the edition, in English; manuscript names expanded to shelfmarks):

Here we understand *jaṭhara*, which usually refers to the stomach, to mean "tough" or "persistent" (cf. *Amarakośa* 3.3.189: *jaṭharaḥ kaṭhine'pi syād adhastād api cādharaḥ*). In 1.27d, the compound *daṇḍasthiratvaṃ* ('steadiness of the spine') is attested by all the important manuscript groups and testimonia, so it was likely original. However, the *Jyotsnā* (1.27d) has *candrasthiratvaṃ* ('steadiness of the moon'), and this reading is well-attested in many manuscripts that are lower on the stemma. Brahmānanda understands steadiness here as 'the absence of flow' (*sthiratvaṃ kṣaraṇābhāvaṃ*), a reference to the moon retaining its nectar.

Word-by-word analysis

1.28. prasārya - having stretched out; pādau - both legs; bhuvi - on the ground; daṇḍa-rūpau - [straight] as a staff, in the form of a stick; dorbhyām - with both hands; pada-agra-dvitayam - the tips of both feet; gṛhītvā - having grasped; jānu-upari-nyasta-lalāṭa-deśaḥ - [one] whose forehead is placed on the knees; vaset - one should stay, sit; idam - this; paścima-tāṇam - the "back-stretch" (paścima — back, western; tāṇa — tension); āhuḥ - they call.

1.29. iti - thus; paścimatāṇam - paścimatāṇa; āsana-agryam - the foremost of āsanas (agrya — first, chief); pavanam - the breath, wind; paścima-vāhinam - flowing backwards (i.e. into the central channel, suṣumṇā);

karoti - it makes, produces; udayam - the rising, increase; jaṭhara-analasya - of the fire of the belly (the digestive fire); kuryāt - it produces, causes; udare - in the belly; kārśyam - leanness, slimness [of the belly]; arogatām - freedom from disease, health; ca - and; puṃsām - in people.

Literal translation

Having stretched out both legs on the ground [straight] as a staff, having grasped the tips of both feet with the hands and placed the forehead on the knees, one should sit: this they call paścimatāṇa. Thus paścimatāṇa, the foremost of āsanas, makes the breath flow backwards, causes the fire of the belly to rise [and] gives people a slim belly and health.

Literary translation

Paścimatāṇa, the "back-stretch". Seated on the ground, one stretches the legs out straight as a stick, takes hold of the toes and lays the forehead on the knees. This foremost of āsanas turns the breath towards the back — into the central channel — fans the digestive fire, makes the belly flat and keeps a person free of disease.

Editors' commentary, on verse 1.28 (as in the edition, in English; manuscript names expanded to shelfmarks):

The reading *dorbhyāṃ padāgradvitayaṃ* is well attested but is somewhat strange because *dos* usually means 'the arm' rather than the hands. The variant *dvābhyāṃ karābhyāṃ dvitayaṃ*, "with both hands", appears to be an attempt to remove *dorbhyāṃ*, but it introduces the problem of the toes not being mentioned.

Editors' commentary, on verse 1.29 (as in the edition, in English; manuscript names expanded to shelfmarks):

The use of the word *paścima* to mean the central channel is found at *Yogabīja* 95 (*paścimamārgataḥ*), 108 (*paścime pathi*), 117 (*paścimadvāramārgeṇa*) and 121 (*paścimaṃ*). Cf. the usages of *paścimamārga* in *Dattātreyayogaśāstra* 140 and *Śivasaṃhitā* 3.110 (from which this verse is likely to be derived). Brahmānanda understands *paścima* as referring to the Suṣumṇā (*Jyotsnā* 1.29): *paścimavāhinaṃ paścimena paścimamārgeṇa suṣumṇāmārgeṇa vahatīti paścimavāhī*.

10. Mayūrāsana — the peacock pose

Word-by-word analysis

1.30. dharām - the ground; avaṣṭabhya - having propped oneself firmly; karasthalābhyām - with both palms (kara-sthala — the palm of the hand); kūrpara-sthāpita-nābhi-pārśvaḥ - [one] whose elbows are set at the sides of the navel; uccāsanaḥ - with the body raised high; daṇḍavat - like a staff, straight; utthitaḥ - risen, lifted; khe - in the air, in the sky; mayūram - the "peacock"; etat - this; pravadanti - they call, proclaim; pīṭham - posture (lit. seat, place).

1.31. harati - it carries away, destroys; sakala-rogān - all diseases; āśu - quickly; gulma-udara-ādīn - beginning with gulmas (internal knots or tumours) and [diseases] of the belly; abhibhavati - it overcomes; ca - and; doṣān - the [disorders of the three] doṣas; āsanam - the posture; śrī-mayūram - the glorious peacock; bahu-kadaśana-bhuktam - food eaten much and badly; bhasma - to ashes; kuryāt - it turns; aśeṣam - entirely, without remainder; janayati - it generates; jaṭhara-agnim - the fire of the belly; jārayet - it digests; kālakūṭam - [even] deadly poison (kālakūṭa — "the black peak", a most virulent poison).

Literal translation

Having propped oneself on the ground with both palms, with the elbows set at the sides of the navel, raised upright into the air like a staff — this [posture] they call the peacock. The posture "glorious peacock" quickly carries away all diseases, overcomes [the disorders of] the doṣas beginning with gulmas and ailments of the belly; it turns to ashes everything eaten to excess or badly, generates the fire of the belly [and] digests [even] deadly poison.

Literary translation

Mayūrāsana, the "peacock pose". Resting the palms on the ground and planting the elbows at either side of the navel, one lifts the body into the air and holds it there, stretched taut. The glorious peacock pose at once drives off every ailment and masters the doṣa imbalances, beginning with tumours and disorders of the belly; it burns up surplus and unwholesome food, kindles the digestive fire and digests even deadly poison.

Editors' commentary, on verse 1.30 (as in the edition, in English; manuscript names expanded to shelfmarks):

There is no direct source of this verse, but it has the same elements as two verses in the *Vasiṣṭhasaṃhitā* (1.76–77), which are themselves derived from earlier Vaiṣṇava sources (see *Mallinson* 2014: 227 n. 9). The compound *uccāsanaḥ* in the third verse quarter seems to approximate in a somewhat vague way the *Vasiṣṭhasaṃhitā*'s reading *samunnataśiraḥpādaḥ*. In the second verse quarter, the pronoun in *tatkūrpara-* refers to the two hands. This is stated more explicitly (i.e. *hastayoḥ kūrparau*) in *Vasiṣṭhasaṃhitā* 1.76c and *Yogayājñavalkya* 3.15c.

Word-by-word analysis

1.32. uttāna-śava-vat - like a corpse laid face upwards (uttāna — turned up; śava — corpse); bhūmau - on the ground; śayanam - lying; tu - but, and; śavāsanam - Śavāsana, the “corpse pose”; sarva-āsana-śrānti-haram - removing the fatigue of all āsanas (śrānti — weariness; hara — removing); citta-viśrānti-sādhanam - a means of settling the mind (viśrānti — repose).

Literal translation

Lying on the ground face upwards like a corpse — [this is] Śavāsana; it removes the fatigue of all āsanas [and] serves to settle the mind.

Literary translation

Śavāsana, the “corpse pose”: one lies on the ground on one’s back, like a lifeless body. It takes away the fatigue of any āsana and gives the mind repose.

Word-by-word analysis

1.33. caturāśīti-āsanāni - eighty-four āsanas; śivena - by Śiva; kathitāni - taught, told; tu - indeed; tebhyaḥ - from them; catuṣkam - a four; ādāya - having taken; sāra-bhūtam - the essential (lit. “being the essence”); bravīmi - I tell, call; aham - I.

1.34. siddham - the [pose] of the siddhas — Siddhāsana; padmam - the lotus — Padmāsana; tathā - also; siṃham - the lion — Siṃhāsana; bhadram - the auspicious — Bhadrāsana; ca - and; iti - thus; catuṣṭayam - a group of four; śreṣṭham - the best; tatra api - and among them; ca - and; sakhe - O friend!; tiṣṭha - stay, remain; siddhāsane - in Siddhāsana; sadā - always.

Literal translation

Eighty-four āsanas were taught by Śiva; from them, taking a four, the essential [ones] I tell. Siddha, padma, siṃha and bhadra — this four is the best; and among them, O friend, always stay in Siddhāsana.

Literary translation

Śiva proclaimed eighty-four āsanas. From them I have chosen four principal ones and shall describe them. The four [poses] — siddha, padma, siṃha and bhadra — are held to be the best. And above them all, O friend, stands Siddhāsana: in it, remain always.

Editors’ commentary, on verse 1.33 (as in the edition, in English; manuscript names expanded to shelfmarks):

The word *tu* is often used to introduce a new posture, but in this case seems to be a verse filler. In the first and third verse quarters, Svātmārāma appears to have rewritten *Śivasaṃhitā* 3.96 to include the information that it was Śiva (*śivena*) who taught the eighty-four *āsana*s, whereas in the source Śiva is himself speaking. Svātmārāma also changes the meaning of the second half of the verse, as the *Śivasaṃhitā* states that Śiva picked out the four best postures and taught them, whereas in the *Haṭhapradīpikā* it reads as though Svātmārāma himself is responsible for picking out the four best postures and teaching them. There are other instances in the *Haṭhapradīpikā* where Svātmārāma borrows a verse with a first person verb (e.g. 3.43). However, in this instance, he may have intended to indicate that he chose the four postures coming after this verse (i.e. *siddha*, *padma*, *siṃha* and *bhadra*) because the *Śivasaṃhitā* follows 3.96 with teachings on the postures called *siddha*, *padma*, *paścimottāna* and *svastika*. The vocative here (*sakhe*) is also found in *Haṭhapradīpikā* 4.56, which is also likely to be an authorial verse.

Editors' commentary, on verse 1.34 (as in the edition, in English; manuscript names expanded to shelfmarks):

It is likely that the original version of this verse contained the vocative with the imperative form of the verb (*sakhe tiṣṭha*). There are other instances where Svātmārāma included a verse with the vocative (e.g. 4.7c, 4.56b, 4.72d, 4.74c) as though the text were a dialogue. Other versions of this verse are transmitted by some manuscripts of the *Haṭhapradīpikā*, in which the vocative and imperative verb have been removed. In these cases, *sukhe* and *sukham* are difficult to construe because the context suggests that the intended meaning was that one should always sit in *siddhāsana* (as opposed to the other three *āsana*s), rather than the prescription to always sit in a comfortable *siddhāsana*.

12. Siddhāsana — the adept's pose

Verses: 1.35, 1.36, 1.37, 1.38, 1.39, 1.40, 1.41, 1.42, 1.43

Two descriptions (1.35 and 1.36), a list of alternative names (1.37) and a long group of praise verses (1.38–1.43). Verse 1.43 is absent from Sarasvatī Bhavan (ms. no. 29899), Vārāṇasī.

Edition translation (English): [The yogi] should put the heel at the perineum, firmly place the [other] foot on the penis, focus the mind, hold the body erect and [remain] motionless, his senses restrained, gazing between the brows with his eyes unmoving. This, which breaks open the door to liberation, is called the adept's pose.

Our rendering: Siddhāsana: the heel at the perineum, the other foot on the penis, the mind collected, the body straight and motionless, the senses restrained, the gaze fixed between the eyebrows — this pose opens the door to liberation.

Literal translation

Having placed the heel (the base of the foot) in the perineum and firmly set one foot upon the penis, [the yogi], with the mind fixed on one, holding the body even, motionless as a post, with the senses restrained, gazing with an unwavering look into the space between the eyebrows — [abides in] what is called Siddhāsana, which breaks open the shutters of the door of liberation.

Having placed the left ankle above [the penis] and the other ankle on top — this will be Siddhāsana.

This [pose] some call Siddhāsana, others know [as] Vajrāsana, some say Muktāsana, and others call it Guptāsana.

As moderation in food among the yamas [and] ahiṃsā among the niyamas — so the one chief [pose] among all āsanas the adepts know [to be] Siddhāsana.

Among the eighty-four postures one should always cultivate the [pose] of the siddhas precisely — as among the seventy-two thousand channels [one chooses] Suṣumṇā.

Meditating on the self, moderate in food, for twelve years by constant practice of Siddhāsana the yogi attains niṣpatti. What [is the use] of the many tiring postures when Siddhāsana is there?

When the prāṇa breath is carefully stopped in kevala-kumbhaka, the "beyond-mind" state (unmanī) arises of itself, without effort.

In just the same way, when one alone is firmly and constantly held — Siddhāsana — the three locks arise of themselves, without effort.

There is no posture like Siddhāsana; there is no breath-retention equal to kevala; there is no mudrā equal to khecarī; there is no dissolution [of mind] like the [inner] sound (nāda).

Literary translation

Siddhāsana, the "adept's pose". The heel is pressed to the perineum and the other foot set firmly upon the penis; the body is held straight and motionless as a post, the senses are restrained, and the gaze is fixed between the eyebrows. This pose breaks the bolts of the gates of liberation.

The second description is simpler: the left ankle is laid over the penis and the second ankle above it. Some call this pose Siddhāsana, others Vajrāsana, some say "Muktāsana", and others "Guptāsana".

As moderation in food is first among the yamas, and non-violence first among the niyamas, so the adepts hold Siddhāsana to be the chief of all āsanas. Of the eighty-four postures one should always choose Siddhāsana — as of the seventy-two thousand channels [one chooses] Suṣumṇā.

Whoever meditates on the self, eats in moderation and practises Siddhāsana for twelve years without fail, attains niṣpatti, the fullness of perfection. Why [bother with] the many tiring postures when Siddhāsana is there?

Let the prāṇa breath be carefully held in kevala-kumbhaka — and "beyond-mind" (unmanī) will come of itself, without any effort. And in just the same way, let one firmly and constantly sit in Siddhāsana, and the three locks engage by themselves.

There is no posture equal to Siddhāsana, no breath-retention equal to kevala, no mudrā equal to khecarī, and no dissolution of mind like [the contemplation of] nāda.

Editors' commentary, on verse 1.35 (as in the edition, in English; manuscript names expanded to shelfmarks):

In the second verse quarter, the adopted reading *ekahṛdayo* is supported by two manuscripts of the *Haṭhapradīpikā* (Jodhpur 02232, Jodhpur and one more manuscript whose shelfmark is not given in the edition) and is close to the NGMPP B 62-20, Nepal (microfilm) reading *ekahṛdaye*. It is also attested by the six-chapter *Vivekamārtaṇḍa* and the *Yogacintāmaṇi*, which attributes this verse to an unkown work called the *Pavanayogasaṅgraha*. In this case, *ekahṛdayaḥ* appears to describe the yogi as having his mind focused on one thing. There are many variations of this verse quarter in the *Haṭhapradīpikā* manuscripts, as well as in the manuscripts of the sources and testimonia. Most of the collated witnesses have *athaikam eva hṛdaye dhṛtvā*, which is close to the adopted reading. Other readings allude here to the practice of the Jālandhara lock, in which the chin is placed on the chest. This is most clearly seen in the *Jyotsnā*'s version, *hṛdaye kṛtvā hanuṃ susthiram* ('having put the jaw firmly on the chest'). The other well-attested reading, *athaikaṃ eva niyataṃ*, was an attempt to fix the problem of *hṛdaye* by replacing it with *niyatam*, which must be read with *meḍhre pādam athaikaṃ* ('having fixed one foot on the penis'), but *niyatam* is redundant here because of *vinyaset* in the first verse quarter.

Editors' commentary, on verse 1.36 (as in the edition, in English; manuscript names expanded to shelfmarks):

Svātmārāma's introductory and following remarks to verse 1.36 indicate that he preferred the *siddhāsana* of the *Vivekamārtaṇḍa* over the version taught as *muktāsana* in the *Vasiṣṭhasaṃhitā* and *Yogayājñavalkya*.

Editors' commentary, on verse 1.39 (as in the edition, in English; manuscript names expanded to shelfmarks):

Most witnesses have *suṣumṇām* as the object of the verb *abhyaset*, which is odd. Others have tried to make sense of this by changing *suṣumnām iva nāḍiṣu* to *nāḍīnāṃ malaśodhanam*, which occurs in the *Jyotsnā* (1.39), *Kumbhakapaddhati* (120), and *Haṭhayoga* (quoted in the *Yogacintāmaṇi*, f. 79r). This variant reading

is probably a patch as no other texts say that *siddhāsana* clears the channels. It could have been borrowed from verse 3.102*1ab, which has the same half-verse and was added to the section on* śakticālana*.*

Editors' commentary, on verse 1.40 (as in the edition, in English; manuscript names expanded to shelfmarks):

The notion of *āsana*s causing fatigue (*śrama*) was mentioned earlier in the verse on the corpse pose (1.32).

13. Padmāsana — the lotus pose

Verses: 1.44, 1.45–46, 1.47, 1.48, 1.49

Verses 1.44 and 1.45–46 are two descriptions (1.45–46 adds the locks and breath-retention), 1.47 is a praise, 1.48–1.49 practice and "liberation at death in the lotus". Verse 1.48 is absent from the manuscript "pi-1".

Edition translation (English): Place the right foot on the left thigh, and the left on the right thigh, firmly hold the big toes with the hands crossed behind the back, put the chin on the chest and gaze at the tip of the nose. This, which destroys diseases for those who are disciplined, is called the lotus pose.

Our rendering: Padmāsana: the right foot on the left thigh, the left on the right; the toes held with the hands passed behind the back; the chin on the chest and the gaze on the tip of the nose — the pose that destroys disease.

Edition translation (English): A man should put his hands together in a bowl shape, very firmly assume *padmāsana*, place the chin tight on the chest and meditation in the mind. Raising the *apāna* breath over and over again [and] releasing the inhaled *prāṇa*, he attains unequalled knowledge through the power of the goddess [Kuṇḍalinī].

Our rendering: Hands joined like a casket, firmly seated in the lotus, the chin pressed to the chest, the mind in meditation — raising the apāna breath again and again and releasing the filled prāṇa, one attains unequalled knowledge by the power of Śakti.

Word-by-word analysis

1.44. vāma-ūru-upari - upon the left thigh; dakṣiṇam caraṇam - the right foot; ca - and; saṃsthāpya - having placed; vāmam - the left; tathā - in the same way; yāmya-ūru-upari - upon the right thigh (yāmya — "southern", i.e. right); paścimena vidhinā - in the "backward manner", i.e. with the hands passed behind the back; dhṛtvā - holding; karābhyām - with both hands; dṛḍham - firmly; aṅguṣṭhau - the big toes [of both feet]; hṛdaye - at the heart, on the chest; nidhāya - having placed; cibukam - the chin; nāsā-agram - the tip of the nose; ālokayet - one should gaze at; etat - this; vyādhi-vighāta-kāri - destroying disease (vighāta — destruction; kāri — producing); yaminām - for those who keep the vows (yamin); padmāsanam - Padmāsana, the "lotus pose"; procyate - is called.

1.45–46. uttānau caraṇau - the feet turned upwards; kṛtvā - having made, placed; ūru-saṃsthau - set upon the thighs; prayatnataḥ - carefully; ūru-madhye - in the middle of the thighs; tathā - likewise; uttānau - turned upwards, palms up; pāṇī - the two hands; tataḥ - then; dṛśau - the two eyes; nāsā-agre - on the tip of the nose; vinyaset - one should fix, place; rāja-danta-mūlam - the root of the uvula (lit. "of the king's tooth"; rājadanta — the uvula); ca - and; jihvayā - with the tongue; uttabhya - having raised; cibukam - the chin; vakṣasi - on the chest; āsthāpya - having placed; pavanam - the breath; śanaiḥ - slowly, gently.

1.47. idam - this; padmāsanam - Padmāsana; proktam - is declared; sarva-vyādhi-vināśanam - destroying all diseases (vināśana — destruction); durlabham - hard to attain (dur-labha — "hard to get"); yena kenāpi - by anyone at all; dhīmatā - by the wise; labhyate - is attained; bhuvi - on earth.

1.48. kṛtvā - having made, joined; saṃpuṭitau karau - both hands joined like a casket (saṃpuṭita — folded together); dṛḍhataram - very firmly; baddhvā - having taken up, "bound" [the pose]; tu - and; padmāsanam - Padmāsana; gāḍham - tightly; vakṣasi - on the chest; saṃnidhāya - having placed; cibukam - the chin; dhyānam - meditation; ca - and; tat - that; cetasi - in the mind; vāram vāram - again and again; apānam - the apāna breath; ūrdhvam - upwards; anilam - the breath (anila — wind); proccālayan - causing to rise; pūritam - the filled [inhalation]; muñcan - releasing; prāṇam - the prāṇa breath; upaiti - he reaches; bodham

- knowledge, awakening; atulam - unequalled; śakti-prabhāvāt - through the power of [the goddess] Śakti; naraḥ - a man.

1.49. padmāsana-sthitaḥ - abiding in Padmāsana; yogī - the yogi; nāḍī-dvāreṣu - at the openings of the channels (lit. "at the doors of the nāḍīs"); pūrayan - filling; mārutam - the air, the breath (māruta — wind); mārayet - he stills (lit. "kills"); the edition's translation has "dies"; yaḥ tu - whoever; saḥ - he; muktaḥ - is liberated; na - not; atra - here, in this; saṃśayaḥ - doubt.

Literal translation

Having placed the right foot upon the left thigh and the left in the same way upon the right, firmly holding [the toes] with both hands [passed] behind the back, placing the big toes [of the feet] at the heart and [pressing] the chin, one should gaze at the tip of the nose: this is called Padmāsana, which destroys disease in those who keep the vows.

Carefully placing the feet turned upwards upon the thighs and the hands turned upwards in the middle of the thighs, then fixing both eyes on the tip of the nose, raising the root of the uvula with the tongue, placing the chin on the chest, one should slowly [draw] the breath.

This Padmāsana is declared to destroy all diseases; hard to attain for anyone, it is attained on earth by the wise.

Joining the hands like a casket, firmly taking up Padmāsana, laying the chin tightly on the chest and [holding] meditation in the mind, again and again raising the apāna breath upwards [and] releasing the filled prāṇa breath, a man through the power of Śakti attains unequalled knowledge.

A yogi abiding in Padmāsana [and] filling with breath the openings of the channels — whoever thus stills the breath is liberated; there is no doubt here.

Literary translation

Padmāsana, the "lotus pose". The right foot is laid on the left thigh, the left on the right; the hands are passed behind the back and firmly seize the big toes; the chin is pressed to the chest and the gaze rests on the tip of the nose. This pose shatters the ailments of those who keep the vows.

[The second description adds the locks:] the feet are turned up and laid on the thighs, the palms turned up in the middle of the thighs; the gaze rests on the tip of the nose; the tongue raises the root of the uvula and the chin is pressed to the chest while the breath is drawn slowly and evenly. This Padmāsana, destroyer of all diseases, is not given to everyone: on earth only the wise attain it.

Joining the palms like a casket, seated firmly in the lotus, the chin pressed to the chest and the mind held in concentration, [the yogi] again and again raises the apāna breath and releases the filled prāṇa breath — and by the power of [the goddess] Śakti gains unequalled knowledge. And whoever, seated in the lotus, fills the openings of the channels with air and stills the breath, is liberated — of this there is no doubt.

Editors' commentary, on verse 1.45–46 (as in the edition, in English; manuscript names expanded to shelfmarks):

The syntax of this verse as we have presented it is incomplete: at its end *pavanaṃ śanaiḥ*, 'the breath gradually', is left hanging. In the source text, the *Dattātreyayogaśāstra*, the following verse completes the syntax with *pūrayed*, "one should inhale". Either Svātmārāma chose to leave the verse hanging (the following verse in the *Dattātreyayogaśāstra* adds nothing about the form of the posture, which is the topic here) or the verse that completes the syntax fell out, perhaps because of a scribal error that happened early in the transmission. In the *Dattātreyayogaśāstra* verses 36 and 37 both end with *pavanaṃ śanaiḥ*, the repetition of which may have caused an eyeskip. The manuscript readings with *vakṣa sthāpayet* (MSPP Jodhpur 2230, Mehrangarh Fort, Jodhpur and Sarasvatī Bhavan, ms. no. 29899, Vārāṇasī) or something similar (Sarasvatī Bhavan, ms. no. 30109, Vārāṇasī) do not offer a solution to the incomplete syntax and do not indicate that Svātmārāma rewrote *Dattātreyayogaśāstra* 36 so that he could omit *Dattātreyayogaśāstra* 37. (The readings *osthāpyot* (Jodhpur 02235, Jodhpur and "pi-1" (the project's working code; shelfmark not disclosed)) and *otthāpya* (Sarasvatī Bhavan, ms. no. 30051, Vārāṇasī) are surprising and are perhaps Middle Indic forms in which Sanskrit *ava-* becomes *o-*.) In the absence of evidence that Svātmārāma included

Dattātreyayogaśāstra 37 or wrote a coherent version of *Haṭhapradīpikā* 1.46, we have made sense of *pavanaṃ śanaiḥ* by adding "[draw in]" in our translation. Brahmānanda's comment on the statement, 'having raised the root of the uvula with the tongue' (*rājadantamūlaṃ ca jihvayā uttabhya*) in 1.46 is worth noting. In the context of Haṭhayoga, one would assume this statement to be referring to a type of *khecarīmudrā*, in which the tongue lifts the root of the uvula, here called the 'royal tooth' (*rājadanta*, on the meaning of which see *Mallinson* 2007: 209 n. 258). However, Brahmānanda understands it differently (synonyms omitted for clarity): rājadantānāṃ daṃṣṭrāṇāṃ savyadakṣiṇabhāge sthitānāṃ mūle ubhe mūlasthāne jihvayā uttambhya ūrdhvaṃ stambhayitvā/ gurumukhād avagantavyo'yaṃ jihvābandhaḥ/ Pushing against both roots of the front teeth on the left and right with the tongue […] — this fixation of the tongue has to be understood from the mouth of the teacher. Brahmānanda appears to have had in mind a probably older rule for meditation postures, according to which the tongue rests near the front teeth. One example of this is in *Svacchandatantra* (4.365f.), which teaches a meditation pose called *divyaṃ karaṇam*, in which the tongue is to rest at the tip of the teeth (*dantāgre jihvām ādāya*). Other Tantric texts have this or similar rules, in which the tongue is supposed to rest either on the teeth or the palate, early examples being the *Mṛgendrāgama*, *yogapāda* 19 (*dantāgre jihvām ādāya*) and *Mataṅgapārameśvaratantra*, *yogapāda* 2.27 (*tālumadhyagatenaiva jihvāgreṇa*). Placing the tongue where it does not disturb the meditation seems quite appropriate for a 'normal' meditative practice (The rule of placing the tongue at the palate is also found in *Īśānaśivagurudevapaddhati* 18.120: *tāluke jihvāṃ saṃyojya kiñcidvivṛtavaktro dantair dantān asaṃspṛśan ṛjukāyaḥ*. For similar references in tantric and other works see *Mallinson* 2007: 17–24.). When the context is haṭhayogic physiology, placing the tongue at the uvula, which is the source of 'nectar', is more appropriate. Confusingly, yogic terminology includes many names for the uvula, and among these especially the term *rājadanta* may give rise to confusion, since, as we have seen, the tongue might also in some yoga systems be placed at the front teeth. Furthermore, the haṭhayogic *khecarīmudrā* has been described in manifold ways. Usually the tongue is said to be inserted into the cavity above the palate but in some cases it is placed at the uvula. Thus the tenth-century *Mokṣopāya* (5.55.14c) says that the tongue rests at the 'source of the palate' (*tālumūlatalālagnajihvā*) and the commentary, the *Saṃsārataraṇi*, on the parallel passage in *Laghuyogavāsiṣṭha* V.6.155, which reads *tālumūlāntarālagnajihvā*, explains that this means that the tongue is to be placed in the middle of the two regions of the palate, and that this is the *nabhomudrā*, alias '*khecarī*' (*tālumūlāntarālagnajihvamūlaḥ tālumūlayoḥ kākudamūladeśayoḥ āntare lagnam ālagnam jihvāmūlam yasyety anena nabhomudrā darśitā / yā hi khecarīty ucyate*). A little later in the *Mokṣopāya* (5.78.24ab) it is made clear that one should reach the uvula, 'at the root of the palate' (*tālumūlagatāṃ yatnāj jihvayākramya ghaṇṭikām*). In view of this background we must conclude that the author of the *Jyotsnā* was probably not aware of the yogic meaning of *rājadanta* and has tried his best to make sense of the passage, echoing the idea of the two roots of the palate (although his text is not talking about the palate), but then referring to the instruction of the teacher for practical details, probably noticing that his literal interpretation is somewhat opaque. In addition to his commentary on 1.46 (translated above), Brahmānanda's comments on *rājadantasthajihvāyām* at 3.22 indicate that he thought the *rājadanta* refers to the front teeth (*kutaḥ*? *yato dantānāṃ rājāno rājadantā rājadanteṣu tiṣṭhatīti rājadantasthāḥ, rājadantasthā cāsau jihvā ca tasyāṃ rājadantasthajihvāyāṃ bandhaḥ, taduparibhāgasya sambandhaḥ śastaḥ*).

Editors' commentary, on verse 1.47 (as in the edition, in English; manuscript names expanded to shelfmarks):

In this context, the word *durlabham* is somewhat ambiguous as to whether the posture is hard to perform or hard to acquire (the more usual meaning). In commenting on *durlabham* in *Jyotsnā* 2.74, Brahmānanda glosses it as *duṣprāpam*, which means 'difficult to attain' and 'inaccessible.' The comment added to this verse by Svātmārāma indicates that he prefers the second version of *padmāsana*, which derives from the *Dattātreyayogaśāstra*, rather than the one he has borrowed from the *Vivekamārtaṇḍa*.

Editors' commentary, on verse 1.48 (as in the edition, in English; manuscript names expanded to shelfmarks):

The text at end of the second verse quarter is uncertain. Later witnesses, including Brahmānanda, have *dhyāyaṃś ca* but none of the early ones has this reading. We are taking *dhyānaṃ* with *saṃnidhāya*, but this renders *tat* problematic because it has no clear referent. In the source text, the *Vivekamārtaṇḍa*, *tat* appears

to refer to the *mokṣadvāra* broken by *kuṇḍalinī*, which is mentioned in the previous verse. The two participles *proccālayan* and *muñcan* imply that the two things are happening at the same time, which is surprising but perhaps possible.

Editors' commentary, on verse 1.49 (as in the edition, in English; manuscript names expanded to shelfmarks):

It is not unusual to read forms from *pṝ* with the locative as seen in this verse (cf. *pūrayen mukhe* in *Amaraugha* 21d) but it is not clear what is meant here. *Siddhasiddhāntapaddhati* 1.66 identifies the ten *dvāra*s at which the ten principle channels terminate, and adds that all other channels terminate at the pores of the skin. Perhaps the primary *nāḍīdvāra*s are intended here, and the yogi is to fill himself up with air through each of them. Alternatively, the meaning could be that by filling the *dvāra*s with air, the yogi is blocking them, thus enabling the stilling of the breath as described in some secondary readings in the second half of the verse. This appears to be how this verse is understood at *Haṭhatattvakaumudī* 17.30 (cf. *Yogatattvopaniṣad* 141–142). The *Jyotsnā* (1.49) has *nāḍīdvāreṇa* instead of *nāḍīdvāreṣu*, which Brahmānanda understands to mean "by way of the opening of the central channel (*suṣumnāmārgeṇa*)". This yields the idea of filling up the central channel (as opposed to other channels), which is described in the *Yogabīja* (94–95). In order to make sense of this verse we have understood *mārutaṃ* to be read with the preceding line, as the object of *pūrayan*. Such enjambement is rare in *haṭha* texts (other than the *Dattātreyayogaśāstra*) and is absent from the verses which we have identified as authorial. We have not identified a source text for this verse but the enjambement and its unusual teaching suggest that there may be one. The unusual enjambement accounts for many of the variants in the second line, with Jodhpur 02235, Jodhpur reading *mārutaṃ mārayed yas tu*, invoking an alchemical metaphor for stilling the breath as found in the *Amṛtasiddhi* (see *Mallinson* 2021). The reading *dhārayet* found in some later witnesses may have resulted from confusion over the meaning of *mṛ* in this context.

Edition translation (English): [The yogi] should put both ankles at the sides of the perineal seam below the scrotum. He should place the left ankle on the right, the right ankle on the left and both hands on the knees, spread his fingers, open his mouth and gaze in deep concentration at the tip of his nose. This is the lion’s pose, which is always honoured by yogis. It causes the three locks to arise together and is the best of [all] postures.

Our rendering: Both ankles below the scrotum at the sides of the perineal seam, left over right and right over left; the hands on the knees with the fingers spread; the mouth open and the gaze fixed on the tip of the nose — the lion pose, honoured by yogis, joining the three locks and the best of āsanas.

Literal translation

Both ankles one should place below the scrotum at the sides of the perineal seam: the left ankle on the right, the right on the left. Having placed both hands on the knees and spread the fingers, with the mouth open one should gaze, well concentrated, at the tip of the nose. This is Siṃhāsana, always honoured by yogis; it brings the three locks together and [is] the best of āsanas.

Literary translation

Siṃhāsana, the "lion pose". Both ankles are laid below the scrotum at the sides of the perineal seam: the left to the right, the right to the left. The palms are set on the knees, the fingers spread wide, the mouth opened, and, fully concentrated, one looks at the tip of the nose. Yogis always honour this pose: it brings the three locks together at once and surpasses all other āsanas.

Editors' commentary (as in the edition, in English; manuscript names expanded to shelfmarks):

Spreading the fingers and keeping the mouth wide open mimic a lion, and this is depicted in some iconography of Yoganarasiṃha (for example, Yoga Narasimha, Vishnu's Man-Lion Incarnation, Samuel Eilenberg Collection, Bequest of Samuel Eilenberg, 1998, Accession Number: 2000.284.4. https://www.metmuseum.org/art/collection/search/39251). As far as we are aware, there is no source for the line (1.52cd) mentioning the three locks, so it may have been composed by Svātmārāma or borrowed from a lost work.

15. Bhadrāsana / Gorakṣāsana — the “auspicious” pose

Verses: 1.53–54

Verses 1.53–54; the yogis of the siddha tradition call it Gorakṣa’s pose. Between the quarters 1.53ab and 1.53cd three witnesses have an additional line — see the footnote.

Edition translation (English): [The yogi] should put both ankles at the sides of the perineal seam below the scrotum. By firmly and very steadily holding the sides of the feet with the hands, the friendly pose arises, which cures all diseases and poisons. Yogis of the Siddha tradition call it Gorakṣa’s pose (*gorakṣāsana*).

Our rendering: The ankles below the scrotum at the sides of the seam; the sides of the feet gripped with the hands and complete stillness — the auspicious pose, which removes all diseases and poisons and is called by the siddhas Gorakṣa’s pose.

Literal translation

Both ankles one should place below the scrotum at the sides of the perineal seam; and holding the sides of the feet firmly with both hands, [one sits] quite motionless. This will be Bhadrāsana, taking away all diseases and poisons; the siddha yogis, indeed, call it "Gorakṣa's pose".

Literary translation

Bhadrāsana, the "auspicious pose". The ankles are laid below the scrotum at the sides of the perineal seam, the sides of the feet are gripped firmly with the hands, and one sits in complete stillness. This pose drives away all diseases and poisons, and the siddha yogis call it Gorakṣāsana.

Editors' commentary (as in the edition, in English; manuscript names expanded to shelfmarks):

We have understood *pārśvapāda* as a *ekadeśitatpuruṣa* meaning the side of the foot, like *agrapāda*, the toes. Manuscripts of two early groups, "gamma" and "pi", as well as the *Jyotsnā* (1.53), include an additional line specifying that the left ankle is placed on the left side and the right ankle on the right (*savyagulphaṃ tathā savye dakṣagulphaṃ tu dakṣiṇe*). This line appears to have been added to make it clear that the ankles are not crossed in *bhadrāsana*, unlike the previous pose, *siṃhāsana*.

Edition translation (English): Posture, manifold breath retention, the bodily technique called seal, then concentration on the internal sound is the sequence of practice in Haṭha.

Our rendering: Āsana, manifold retentions of breath, the technique called mudrā, then attention to the inner sound — this is the order of practice in Haṭha yoga.

Variant readings in the manuscripts:

This verse is absent: Sarasvatī Bhavan, ms. no. 30109, Vārāṇasī, the oldest dated manuscript of the edition (1496 CE).

In the edition — “kumbhakaṃ” (so in all the manuscripts except those listed below). Also “kumbhakaś” — so in: GOML R17256/SR8080, Chennai, i.e. the Government Oriental Manuscripts Library; Maharaja Man Singh Pustak Prakash (MSPP), ms. no. 2230, Mehrangarh Fort, Jodhpur; Sarasvatī Bhavan, ms. no. 29899, Vārāṇasī.

In the edition — “citraṃ” (so in all the manuscripts except those listed below). Also “citra” — so in: NGMPP G 25-2, Nepal, microfilm of the Nepalese-German Manuscript Preservation Project (NGMPP) and Bharata Itihasa Samshodhaka Mandala (BISM), ms. no. 64/919, Pune. Parallel passages in other texts: Yogacintāmaṇi f. 111v (attributed to the Haṭhapradīpikā)

In the edition — abhyāsānukramo haṭhe; abhyāsānukrameṇa ca — in Yogacintāmaṇi.

Word-by-word analysis

1.55. evam - thus; āsana-bandheṣu - in āsanas and locks (bandha — lock); yogīndraḥ - the lord of yogis (yogīndra); vijita-śramaḥ - having overcome fatigue (vi-jita — conquered; śrama — weariness); atha - then; abhyaset - one should practise; nāḍī-śuddhim - the purification of the channels (nāḍī-śuddhi); mudrā-ādi-pavana-kriyām - breath practices with mudrās and the rest (pavana-kriyā — "actions [with] the breath").

1.56. āsanam - āsana; kumbhakam - breath-retention; citram - manifold (citra — variegated); mudrā-ākhyam - called mudrā; karaṇam - the [bodily] technique; tathā - then, as well as; atha - then; nāda-anusandhānam - attending to the [inner] sound (anusandhāna — following, attending to); abhyāsa-anukramaḥ - the order of practice (anukrama — sequence); haṭhe - in Haṭha [yoga].

Literal translation

Thus, O lord of yogis, having overcome fatigue in āsanas and locks, one should then practise the purification of the channels — breath practices with mudrās and the rest.

Āsana, manifold breath-retention, the technique called mudrā, then attending to the sound — such is the order of practice in Haṭha [yoga].

Literary translation

Thus, having mastered the āsanas and the locks and overcome fatigue, the lord of yogis takes up the purification of the channels — the breath practices with mudrās and the rest.

First āsana, then manifold kumbhakas, then the "doing" called mudrā, and finally listening to the [inner] nāda — such is the order of practice in Haṭha yoga.

Editors' commentary, on verse 1.55 (as in the edition, in English; manuscript names expanded to shelfmarks):

The second line can be interpreted in different ways. One possibility is to understand *nāḍiśuddhiṃ* as a *bahuvrīhi* qualifying *mudrādipavanakriyām* in the sense that the yogi should practise the breathing techniques by way of the relevant *mudrā*s and locks (taught in the third chapter), from which purification of the channels arise. Alternatively, one could separate *mudrādi* from *pavanakriyām* and understand three different techniques here, namely, the practice of purifying the channels (perhaps by the alternative nostril method mentioned at the beginning of the second chapter), the *mudrā*s and the breathing techniques of *prāṇāyāma*. The absence of a conjunctive particle, such as *ca*, makes the second interpretation less likely. The version of this verse in the *Yogacintāmaṇi* (see the testimonia) was changed to make it clear that *nāḍiśuddhi* and *pavanakriyā* with *mudrā*s are two distinct things.

Editors' commentary, on verse 1.56 (as in the edition, in English; manuscript names expanded to shelfmarks):

This verse was omitted from Sarasvatī Bhavan, ms. no. 30109, Vārāṇasī, the oldest dated manuscript. The omission is probably deliberate as that manuscript does not have chapter four, which teaches *nādānusandhāna* and the numbering in Sarasvatī Bhavan, ms. no. 30109, Vārāṇasī indicates that its exemplar included the verse. This verse is similar to 1.65, which has *mudrādikaraṇāni ca*, so perhaps it was through confusion with 1.65 that the same reading is found in some witnesses of 1.56. It seems that each of the four auxiliaries (*aṅga*) of Haṭhayoga is being referred to in the singular (hence *āsanaṃ*), whereas in 1.65 the plural is used (i.e. *pīṭhāni*) which is why we have adopted the reading *citraṃ* [...] *karaṇaṃ tathā*.

Summary statistics: which manuscripts differ from the edition's text, and how often

All mentions of a manuscript in the apparatus of verses 1.19–1.54 have been counted. The only manuscript named in the apparatus by a conventional name is "pi-1" (its shelfmark is not disclosed in the edition).

Conclusion: the manuscripts that deviate most often from the accepted text are Sarasvatī Bhavan, ms. no. 30069, Vārāṇasī; Staatsbibliothek zu Berlin, ms. or. 11056; Sarasvatī Bhavan, ms. no. 29899, Vārāṇasī; Jodhpur 02235 and GOML 18885, Chennai. This is to be expected: the "delta" and "pi" branches are dialectally coloured, and the text of Brahmānanda (after the "Jyotsnā") is a late reworking.

Special cases: exactly what differs in the manuscripts

1. Lost leaves in NGMPP B 62-20 (Nepalese microfilm). In this manuscript the leaves are lost in two places of the section at once: verses 1.18–1.28 and 1.39–1.46; at each of them the apparatus notes "leaf lost". Other manuscripts have omissions too: "zeta-1" lacks verse 1.20; Sarasvatī Bhavan (ms. no. 29899), Vārāṇasī, lacks verse 1.43 (there it stands earlier, before verse 3.32); "pi-1" lacks verse 1.48; Sarasvatī Bhavan (ms. no. 30109), Vārāṇasī, lacks verse 1.56.

2. The manuscript "epsilon-1" has its own list of āsanas. After verse 1.18 it adds two verses with its own enumeration: svastika, gomukha, padma, kūrma, uttānakūrmaka, kukkuṭa, matsyendra, dhanu, paścimatāṇa, mayūra, siddha, siṃha, bhadra, and "the bound lotus" (baddhapatma) — "and so on, many āsanas". This is the same set of fifteen poses, but in a different order and with different names — a rare manuscript witness to the "canon of the fifteen āsanas".

3. An additional line in 1.53. Between the quarters 1.53ab and 1.53cd, NGMPP G 25-2 (Nepal, microfilm), the Lalchand Research Library, M-2089, Chandigarh, and the version of Brahmānanda have an extra line: "savyagulphaṃ tathā savye dakṣagulphaṃ tu dakṣiṇe" — it describes the same as the quarter cd.

4. The dynamic dhanurāsana. In Sarasvatī Bhavan (ms. no. 30051), Vārāṇasī, the scribe left a note: dhanurāsana should be practised without interruption (anavarata), alternately to the left and to the right — that is, as a dynamic practice.

5. A conjecture in 1.35. The reading "ekahṛdayo" was introduced by the editors themselves: the manuscripts give "ekahṛdaye", "eva hṛdaye", "eva niyataṃ", "āsyahṛdaye" and other variants; the accepted reading is supported by texts close in tradition (Vivekamārtaṇḍa, Yogacintāmaṇi).

6. Transpositions. Verse 1.17 is transposed with the following one in Sarasvatī Bhavan (ms. no. 30069), Vārāṇasī; Staatsbibliothek zu Berlin (ms. or. 11056); Sarasvatī Bhavan (ms. no. 30051), Vārāṇasī. And in the manuscript "zeta-1" verse 1.19 stands earlier — before verse 1.17.

7. The structure of "gamma-1" (NGMPP G 25-2). It has its own division into chapters: its "chapter 3" ends with the 100th verse, its "chapter 4" contains 29 verses, and its "chapter 5" corresponds to the ordinary chapter 4. This matters if one checks the numbering against this manuscript.

The apparatus comes from the electronic critical edition of the Haṭhapradīpikā (the "Light on Haṭha Yoga" project, Oxford – Marburg, 2024). The variant readings are rendered faithfully in sense but verbalised into connected English phrases; the renderings, word-by-word analyses and translations are ours, not the edition's. The complete list of witnesses with dates, scribes and descriptions is promised in the introduction to the printed edition (EFEO, late 2026).
